3. **Prohibition on use of AI –**

The software technology known as artificial intelligence has recently expanded its capability to generate text and other work product (AI Generated Work Product). Examples of the technology include what are known as "generative" large language models (LLMs), and a specific implementation what is well known in the general public is ChatGPT. These systems can generate text and other work product in response to prompts and/or input of other text/documents/code/images. The output, the AI Generated Work Product, appears to have human-mimicking "intelligence" and is thus potentially usable as a substitute for material one might generate themselves. AI Generated Work Product can include computer code or programs as well as human language content and materials.

Your continuing enrollment in this course obligates you to not knowingly prompt, generate, or use any AI Generated Work Product in relation to any activity or assessment in this course. This applies to AI Generated Work Product from yourself or others. This obligation includes that your assessment materials in the course be without any contribution from AI Generated Work Product. This obligation specifically extends to not plagiarize any writing required of you for assessment in the course: AI Generated Work Product will be treated as from another/others in applying the plagiarism policy to this course. The

term “assessment” means any material generated for this course that is submitted to the instructor or presented in a class session, regardless whether it is graded content or not. Assessments include mid-terms and final exams. AI Generated Work Product may not be used in the development or drafting of any assessments created by you in a non-proctored environment.
